## Education

**Sardar Patel Institute of Technology.** 2018-Present

- B.Tech - Information Technology, CGPA - 9.83/10

**Vartak College, Vasai.** 2018

- XII - HSC, 96%

**Holy Paradise High School, Vasai.** 2016

- X - SSC, 93.4%

## Internships

**Backend Developer**, Trumpet Media Jul20-Sep20

- **Tech Stack- Celery, Scrapy, Django**
- Programmed web scrapers for extracting product details and reviews achieving a speed of **200 items/min**
- Developed a product with **background scraping jobs** to see well performing tags, commonly used along tags and performance of our posts on the tags

## Curricular Achievements

- Spear-headed the team which got selected in the **Top 40** teams among 500 teams for **Smart Aurangabad Hackathon 2020**
- **1st Place**, FSAI Case Study Competition 2019

## Co-Curriculars

**JPMC SCOPE Track**

- Developed bots for scraping in **Automation Anywhere**
- Data Transformation, Preparation using **Alteryx**
- Introduction to **Markets, Matching Engine and Software Development Life Cycle**

## Extra Curriculars

**Technical Head**, Oculus 2021 Dec20-Feb21

- Structured the entire database and managed the backend using **Cloud Firestore**
- Developed Gallery and Event Pages using **React**

**Finance Head**, Oculus 2020(Codatron) Dec19-Feb20

- Created different financial models, managed entire finances and generated report sheets
- Coordinated with a team of 8, to cater to **250+ participants**

## Social Work

**Beach Cleaning**

- Volunteered and successfully completed 16 hours of Beach Cleaning activity at Versova from July 2019 to February 2020

## Technical Skills

**Languages**

- Python, Java, C

**Web Development**

- HTML, CSS, JavaScript, Bootstrap

**App Development**

- Android(Java), Flutter

**Frameworks**

- Django, Scrapy, Angular, Express.js

**Database Systems**

- Postgres, MySQL, MongoDB, Firebase, Elasticsearch

## Projects

**Social Media API**

July 2020

- Handled Authentication in **DjangoRestFramework**
- Follow a user, post a status, like, comment and share a status features were implemented
- Tried to implement an autocomplete feature, which corrects for spelling mistakes, case insensitivity, and incomplete words search using Levenshtein distance and regex

**Matching Engine**

June 2020

- Studied about order types, trade types, directives in the market
- Designed the database schema for orders and trade using **SQLAlchemy**
- Wrote the market order trading and matching code in the backend using **Flask**. Integrated stop and stop limit orders in the matching engine
- Worked in a team of 10 people following the **Agile** Methodology, collaborated using GitHub

**Wumpus World Problem**

May 2020

- Created an implementation of the Wumpus World Problem in **Javascript**
- Used DFS with Backtracking to evade the Wumpus and the pit
- Implemented one of the actions of the agent i.e to erase the Wumpus when its position is accurately known

**Inventory Management System**

May 2020

- Handled the authentication, equipment cataloging, logs of trade in **Express.js** for an inventory management system web app
- Designed the Database Schema from scratch following the concepts of DBMS
- Created a **Flutter** mobile app for maintenance handling which interacted with the same API
